Good afternoon,

The Pre-RD group has completed data downloads for 10 acoustic releases near river mile (RM) 6, Swan Island Lagoon, and the Willamette Cove. Batteries for all receivers have been replaced and reoriented at low tilt angles (less than 10°). Included is a photo of the NRC crew redeploying PDI-AR-A16 (near RM 6) and anchoring the cable to shore. The shoreline is inaccessible due to shallow waters, so the crew uses a small row boat to access the shore.
